Vision, Missions, Strategic Goal and Educational Philosophy of Faculty of Forestry

1. Vision

By 2035, the Faculty of Forestry will be one of the leading institutions in Vietnam for training, scientific research, and technology transfer in the field of sustainable forest management, environmentally and socially responsible wood-based industry and enhancing the role of forestry in circular economy and climate change mitigation and adaptation.

2. Missions

The Faculty of Forestry provides competent human resources for forestry sector and timber and wood processing industry in Vietnam, advances science and technology, promotes international collaboration and networks to support Vietnam and region's sustainable development goals and socio-economic development pathway.

3. Strategic Goal

The Faculty of Forestry's strategic goal is to ensure its education quality and its ranking in regional and national education system are continuously improved through strengthening international collaboration in research, science and technology development.

4. Educational philosophy

The Faculty of Forestry's educational philosophy focuses on “***Creativity, Practice-Oriented Learning and Integration***”.

The Faculty of Forestry try values the education/learning process as much as the outcome and enables learners to develop their interests, creativity, knowledge, skills, and national and regional network through practical and hands-on experiences. By providing a comprehensive, integrated, and interactive teaching and learning approach, the learners will be able to respond to social needs and regional integration trends.
